**“ At Intelligent Security and Fire, we make sure understanding your needs our number one priority.”**

Intelligent Security and Fire are an accredited independent security systems company based in West London with over 20 years experience providing installation, maintenance, repairs and monitoring of high quality security and fire detection systems for residential and business properties. Our alarm systems are Police recognised and Insurance approved.

With over 200 years of combined expertise our staff have the experience to deliver the best possible results for your project. Every customer has individual system requirements. We provide our clients with specifically designed solutions on time within budget.

***‘Providing the most effective security and fire prevention solutions through careful design, skilled installation and a tailored maintenance schedule.’***

# Design, Installation, Maintenance Takeovers & Repairs.

Intelligent Security and Fire provide a complete range of security and fire prevention services that are individually designed for your specific requirements. This "one stop shop service" reduces time, costs and the complications involved using different companies for various systems & applications and ensures that when required individual systems integrate seamlessly with each other.

Our quality of work and customer service is the foundation of our business and we are proud of the fact that our customers have the belief and confidence to refer us to others.

We aim to provide our customers with the best value for money. All our quotations are completely transparent without hidden extras. We understand in these economically testing times the budget constraints of our clients and will work to provide the correct solution, within budget on time. We constantly monitor our competitors' prices to ensure that we offer the most competitive quotation.

Every customer has individual system requirements. We provide our clients with specifically designed solutions on time within budget.

- Intruder Alarms
- Fire Alarms
- Fire Extinguishers
- CCTV
- Door Entry
- Access Control
- Automated Gates
- Roller Shutters
- Emergency Lighting
- Scaffold Alarms
- Locks & Safes
- Security Grilles
- Home Automation

# Contract Takeovers

Intelligent Security and Fire can takeover and maintain your existing security or fire detection system, regardless of the make or model.

Unlike other companies who insist on 3 year maintenance contracts, our maintenance contracts typically are for 12 months. We believe that if you are happy with our service you will stay with us out of choice but not because you are tied into a long contract.

## **6 Good Reasons to switch to Intelligent Security and Fire:**

Many of our existing customers have approached us to takeover their existing system for the following reasons:

- Unhappy with the quality of service from your existing system company.

- Have a faulty system where your existing company cannot solve the problem.
- Your existing maintenance or monitoring contract comes to an end.
- Your existing company goes out of business.
- You are looking for a more competitive price.
- You have recently moved into premises or a property and have no details about the system.
- You want better customer service from a local firm.

You want to integrate all your intruder, fire, emergency lighting, door access control and CCTV system maintenance contracts into one cost effective package.

# Maintenance Service

Intelligent Security and Fire provide a complete range of security and fire alarm maintenance services for access control systems, CCTV, Door Entry or Intercom systems, Emergency Lighting, Fire Alarms, Intruder alarms, Burglar alarms, Automatic Gates and Security Roller Shutters.

Our dedicated team of service engineers are **on call 24 hours, 7 days a week.**

Maintenance contracts guarantee that your systems are reliable often pre-empting issues that lead to emergency call-outs

Systems that are not maintained cannot be guaranteed to protect property and life.

Our Maintenance Contracts ensure that your Security and Fire Detection systems are maintained to current British and European Standards and that the Maintenance Contracts meet Insurance and regulatory obligations.

We can help make your property a safer place by providing a Maintenance Contract specifically designed to meet your individual needs and budget.

## The Benefits of Maintenance Contracts

- Annual Routine Service
- Priority Diary Scheduling
- Reduced Labour Charges
- Reduced Parts costs
- 24 hours, 7 days a week Telephone Technical Support
- An engineer will endeavour to resolve the problem over the phone before recommending an engineer to attend.

# Intruder Alarms

Whatever your budget and the size of your site, you can be sure that our advice, installation and after-sales service are the best in the security industry, by a totally trustworthy and professional company.

Our highly-skilled team install and maintain all types of fully integrated Intruder Alarm Systems for your offices, factories, warehouses, doctors surgeries and schools, with the best quality equipment available.

Integration is a vital component in effective intruder prevention - it means that, for example, if a perimeter infra-red beam is broken, your CCTV cameras will be automatically directed to the point of the break.

Technologies we can install in your intruder prevention system include:

- Motion detectors
- Broken glass detectors
- Security lighting

Understanding your needs is of paramount importance to us, and we will carry out a full survey of your premises before we do anything else.

Our fully trained team will listen to your concerns, guide you through the options available, and present you with a custom-made and cost-effective solution, specific to you.

We have all the industry accreditations you expect, guaranteeing you peace of mind that we meet the highest standards for fire and security installation. All work carried out for you will be clean and tidy, with outstanding workmanship.

All Intruder Alarms installed by Intelligent Security and Fire engineers are **Police and insurance approved.**

# CCTV Systems

A CCTV system can form an important part of a security plan for domestic, commercial and industrial premises. CCTV provides both a visual deterrent to would-be burglars or vandals and evidence of any incident that may occur. CCTV complements other forms of security, such as Intruder Alarms and Security Shutters.

Intelligent Security and Fire have been installing, maintaining, and repairing CCTV systems to homes, schools, council buildings, shops, office blocks, surgeries, garages, warehouses and many other types of properties for many years with great success. We can cater for CCTV systems from a simple one camera set-up to a system with hundreds of cameras.

Whether you are installing a new system or upgrading your existing one, with our friendly 'can-do, do it now' attitude, we can fulfil your requirements.

We will advise you on the most robust and cost-effective methods of observing your premises – including receiving alerts wherever you are in the world, and being able to monitor your cameras directly on your tablet or smartphone.

If you are considering installing a security system on your premises, Intelligent Security and Fire offer a free, no-obligation site survey so that you can find the security solution best fitted to your needs. One of our surveyors will visit the premises and use their expertise and your input to deliver a no-nonsense quote that will encompass labour, parts, and installation.

I am very pleased with the services the services that Intelligent Security and Fire provide for the London Borough of Brent.

The engineers are highly trained, multi-skilled and always provide a very professional service to sites throughout the Borough.'

*Richard Ubertowski- London Borough Of Brent Facilities Manager*

# Fire Detection and Prevention

Intelligent Security and Fire design, install, maintain, repair and takeover Fire Alarms and Fire Detection systems for both domestic and commercial customers.

Intelligent Security and Fire provide fire detection systems for the smallest kiosk to the largest shopping centre with complex smoke control and phased evacuation of public and staff. We can provide a full fire risk assessment and tailor a solution to meet your needs.

Intelligent Security and Fire carry out professional Fire Risk Assessments for both residential and commercial premises to ensure that you comply with your legal and insurance requirements.

Intelligent Security and Fire can help make your property a safer place by installing and maintaining fire extinguishers as recommended by the Fire Protection Association.

Intelligent Security and Fire supply and maintain all types of Fire Extinguisher, so we are ideally placed to analyse your risks and requirements in addition to installing and maintaining your extinguishers.

Intelligent Security and Fire also design, install, maintain, repair and takeover Fire Alarms and Fire Detection systems for both domestic and commercial customers. We can also provide a full fire risk assessment and tailor a solution to meet your needs.

**"Early intervention is the key to protection from fire. Detection followed by an appropriate action will minimise the risk and loss".**

# Access Control Systems

Intelligent Security and Fire design specialise in Access Control system installation and Access Control system maintenance for both domestic and commercial customers. We also carry out Access Control System repairs and Access Control system upgrades to existing systems.

Access Control Systems range from a simple mechanical combination lock to a multi-door on line computer controlled system. Many businesses need to restrict the flow of employees or visitors to certain areas of their premises which may be sensitive or vulnerable. Security is vital 24 hours a day, seven days a week, therefore access control can be of significant importance on who has access to your

premises.

Access control has a wide variety of applications to operate gates, barriers and doors. From stand alone telephone and video entry systems to on-line computer controlled installations, integrating magnetic card and proximity readers.

Intelligent Security and Fire has the solution for your requirement, on premises from flats and offices to colleges, hospitals and hotels. We connect access control systems to Building Management Systems (BMS) which can enable efficient, intelligent buildings which will turn off/on lighting, power, CCTV and Alarm Systems via an action from using an access control card.

# Door Entry Systems

Intelligent Security and Fire design specialise in Door Entry system installation (Door Intercom installation) and Door Entry system maintenance for both domestic and commercial customers. We also carry out Door Entry System repairs (Intercom repairs) and Door Entry system upgrades to existing systems.

Intelligent Security and Fire provide Door Entry System installation and Intercom installation for a wide variety of Door Entry Systems or Door Intercom systems specifically designed for our customers individual requirements. These systems vary from a single button audio calling station outside the premises, to large audio/video multi-calling stations to audio video multi-handset systems, typically in blocks of apartments. Door Entry systems and Intercom systems are closely related to access control systems and are often integrated so

that those using the building regularly and visitors alike can gain access to a protected area.

Door Entry systems provide a safe and convenient way of authorising access to your property. Visitors can be interrogated with the latest range of audio and video door entry systems linked to handsets monitors or “trend setting” internal recessed modules within the property. These units are so compact they hardly take up any space and a selection of specialised finishes can match in harmony with your décor.

Video entry systems are also available and can be interfaced with internal TV networks and/or CCTV Systems. Some dynamic systems allow the facility of communication via an interface with the internal telephone system for maximum convenience and can also be integrated with access control systems.

# Gate and Barrier Automation

Intelligent Security and Fire's team of accredited engineers design, install, maintain, repair and takeover Automated Gates, Automatic Gates, Barriers and Bollards systems for both domestic and commercial customers.

Controlling the access of both people and vehicles onto site is now an essential management tool for many businesses. Automatic Gates provide a visual and physical deterrent to any intrusion. Installing one not only improves overall site security, but will also facilitate site management.

## Barriers

Parking Barrier systems can provide security for commercial car parks, and our Automatic Barrier Systems can be coupled with an **Intelligent Security and Fire** access control system in order to safely manage access on site.

When gates, barriers and turnstiles are integrated with Access Control and CCTV your site will have the complete control package, allowing you to monitor, record and control movement of staff and visitors- throughout the premises.

Automatic Gates are an excellent way of controlling entry into your home or business premises. They provide a visual and physical deterrent to anyone you do not want to access your property.

Intelligent Security and Fire offer a range of gates that will accommodate the needs of our customers. When considering an installation there are a number of choices to be made; one of these is which kind of gate to choose. There are two main kinds of automatic gate, swing gates and sliding gates.

## Bollards

We can install fixed, manual, or automatic bollards, depending on your needs. Fixed bollards are ideal for permanently blocking or deterring vehicle access to an area, whilst automatic or manual bollards can be used to selectively control vehicle access.
